Pandoc Citation

This document we will give basic citation and footnote referancing in a markdown document to be processed with pandoc later. We will cover the concepts described in the referenced video [1]

And also as we use crossref you may always check its documents [2]

FootNote Referencing

We can also give a footnote ¹

¹Important subject is footnote.

Also note that we can use pagebreaks by simply inserting ‘
' in text without quotes but it spills the markdown also breakdown the
footnote place [3]

Referencing Equations

Let's try some math:

$$x^2 + 2x = y \tag{1}$$

And just under the equation lets give a reference to it: 'As you can see in
equation (eq. 1)

Above crossreferencing is done by filter pandoc-crossref writing before the
citeproc, just like told in the video of Brodie Robertson [4].

Table Referencing

Table 1: Results related to my line.

X	Y
1	1
2	2
3	3
4	4

Here as show in table (tbl. 1), this is done like that!

Referencing Figures

There maybe figures in content like:

Figure 1: Humans

So here you see the figure (fig. 1)
