

Pandoc Citation and Referencing

Cagatay Cakir

2023-02-05 20:20

Abstract

This document is the response for comments in ATN from the Delegation of European Union to Türkiye related to second supply tender dossier of IDEA4ISTANBUL project being conducted by Project Management Directorate of Ministry of Industry and Technology. Responses are prepared by the Project Management Directorate and Idea4Istanbul Project Team (both TA & ERA) collaboration, and formatted into a report by the Project Department of the Directorate.

Contents

1	Pandoc Citation	1

1 Pandoc Citation

This document we will give basic citation and footnote referancing in a markdown document to be processed with pandoc later. We will cover the concepts described in the referenced video [1]

And also as we use crossref you may always check its documents [2]

1.1 FootNote Referencing

We can also give a footnote ¹

Also note that we can use pagebreaks by simply inserting ‘
,’ in text without quotes but it spills the markdown also breakdown the
footnote place

1.2 Referencing Equations

Let’s try some math:

$$x^2 + 2x = y \tag{1}$$

And just under the equation lets give a reference to it: ‘As you can see in
equation (eq. 1)

Above crossreferencing is done by filter pandoc-crossref writing before the
citeproc, just like told in the video of Brodie Robertson [3].

1.3 Table Referencing

Table 1: Results related to my line.

X	Y
1	1
2	2
3	3
4	4

Here as show in table (tbl. 1), this is done like that!

1.4 Referencing a section

Let’s reference the “Referecing Equation” section. Please see (sec. 1.2)

1.5 Referencing Figures

There maybe figures in content like:

So here you see the figure (fig. 1)

References:

¹Important subject is footnote.
